

Lot Screening Report

Report Reference ID: RPT-DE3D302940
Generated: 2026-10-03T18:26:15.682466+00:00
Part Number: DEMO-PN
Lot ID: DEMO-COMPLETE-01
Date Code: 2601
Manufacturer: Northvale Semiconductor
Test Date: not recorded at ingestion
Lot Status: COMPLETE

Methodology

Parts were screened using two complementary modules. Module A flags components that are statistically anomalous relative to their own lot, even when every reading is inside the part's datasheet limit, combining a robust per-parameter z-score, Minimum Covariance Determinant (MCD) distance and an ECOD outlier score. The detector also supports an Isolation Forest score from a pooled cross-lot reference, but the live pipeline supplies no such reference, so that score does not contribute in this build; a REJECT verdict requires corroboration from an explainable detector (z-score or MCD). Module B forecasts each part's 168-hour reading from its 0h/24h readings and flags early rejection against a calibrated safety slope, where trained for the part's parameter; it declines to forecast, rather than guess, for any parameter outside the three it was trained on. The FN:FP cost ratio and PDA threshold used below are disclosed, adjustable defaults, not values derived from field failure data - see the system's Settings screen for their current values.

Summary

Quantity Screened: 77
Quantity Flagged: 15
PDA Result: 0.0779
Overall Lot Disposition: REJECT

Delta-Data Table

Flagged Parts - Explanation and Disposition

DEMO-COMPLETE-01-0000 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0000: prop_delay at 168h is 2.5 robust-sigma above lot median. Predicted 168h drift is under the calibrated safety slope by 70%. Primary driver: 0h-to-96h change.
Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0004 (iddq) - REJECT

Explanation: Part DEMO-COMPLETE-01-0004: iddq at 168h is 8.3 robust-sigma above lot median. Predicted 168h drift exceeds the calibrated safety slope by 103%. Primary driver: 0h-to-96h change.
Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0007 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0007: prop_delay at 96h is 2.3 robust-sigma below lot median. Predicted 168h

drift is under the calibrated safety slope by 79%. Primary driver: 0h-to-24h change.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0014 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0014: iddq at 24h is 1.9 robust-sigma below lot median (median = 6.45 uA, value = 4.62 uA). Predicted 168h drift is under the calibrated safety slope by 80%. Primary driver: 0h baseline value.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0023 (iddq) - REJECT

Explanation: Part DEMO-COMPLETE-01-0023: prop_delay at 96h is 1.9 robust-sigma above lot median. Predicted 168h drift exceeds the calibrated safety slope by 29%. Primary driver: 0h-to-96h change.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0031 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0031: iddq at 0h is 4.3 robust-sigma above lot median (median = 6.33 uA, value = 10.35 uA). Predicted 168h drift is under the calibrated safety slope by 74%. Primary driver: 0h baseline value.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0034 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0034: prop_delay at 168h is 3.0 robust-sigma above lot median. Predicted 168h drift is under the calibrated safety slope by 73%. Primary driver: 0h-to-96h change.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0035 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0035: prop_delay at 0h is 2.1 robust-sigma below lot median (median = 3.766 ns, value = 3.159 ns). Predicted 168h drift is under the calibrated safety slope by 71%. Primary driver: 0h-to-96h change.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0042 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0042: leakage at 0h is 3.1 robust-sigma above lot median (median = 3.3 nA, value = 5.15 nA). Predicted 168h drift is under the calibrated safety slope by 83%. Primary driver: 0h-to-96h change.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0045 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0045: leakage at 0h is 1.7 robust-sigma below lot median (median = 3.3 nA, value = 2.29 nA). Predicted 168h drift is under the calibrated safety slope by 70%. Primary driver: 0h-to-96h change.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0050 (iddq) - REJECT

Explanation: Part DEMO-COMPLETE-01-0050: iddq at 168h is 3.1 robust-sigma above lot median. Predicted 168h drift is under the calibrated safety slope by 58%. Primary driver: 0h-to-96h change.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0057 (iddq) - WATCH

Explanation: Part DEMO-COMPLETE-01-0057: iddq at 96h is 2.1 robust-sigma below lot median. Predicted 168h drift is under the calibrated safety slope by 90%. Primary driver: 0h baseline value.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0059 (iddq) - REJECT

Explanation: Part DEMO-COMPLETE-01-0059: iddq at 0h is 3.3 robust-sigma above lot median (median = 6.33 uA, value = 9.47 uA). Predicted 168h drift is under the calibrated safety slope by 83%. Primary driver: 0h baseline value.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0066 (iddq) - REJECT

Explanation: Part DEMO-COMPLETE-01-0066: iddq at 168h is 4.7 robust-sigma above lot median. Predicted 168h drift exceeds the calibrated safety slope by 71%. Primary driver: 0h-to-96h change.

Disposition: pending reviewer sign-off.

DEMO-COMPLETE-01-0073 (iddq) - REJECT

Explanation: Part DEMO-COMPLETE-01-0073: leakage at 96h is 3.6 robust-sigma above lot median. Predicted 168h

drift is under the calibrated safety slope by 50%. Primary driver: 0h-to-96h change.

Disposition: pending reviewer sign-off.

Analysis History

2026-10-03T18:26:14.780126 [run-b26853e45392] triggered by ingest: Initial analysis run - no prior revision to compare.

Reviewer / Sign-off

No disposition sign-offs recorded yet for this project.
